The Ergonomic Approach of Tatwamasi for World Peace Building Ergonomic and peacebuilding is a multidisciplinary, cross-sector technique or method which becomes strategic when it works over the long run and at all levels of society to establish and sustain relationships among people locally and globally-thus endangering sustainable peace.

Strategic peacebuilding activities address the root causes or potential causes of violence, create a societal expectation for peaceful conflict resolution, and stabilize society politically and socioeconomically. "ergonomic is the scientific discipline concerned with the understanding of interactions among human and the other elements of a system, and the profession that applies theory, principles, data, and methods to design in order to optimize human well-being and overall system performance."

And regarding the world interaction for peacebuilding the philosophy of tatwamasi. Ergonomics as science-based discipline that brings together knowledge from other subjects to ensure that designs complement the strengths and abilities of people and minimize the effects of their limitations. The collective attitudes, beliefs and perceptions of the people in your organizations around safety.

Culture drives behaviors and behaviors drive performance, for better tatwamasi is the approach regarding the safety culture on organization's brand for the people and society as peacebuilding. We believe that our culture and brand are two sides of the same coin. The brand may lag the culture at first, but it will eventually become an anchor that slows down the entrenchment.

this often happens when the frantic need for more production trumps everything, including the health and safety of people. We need to respect like we do for ourselves that

is the approach of tatwamasi in ergonomic cling to the virtue of protecting the well-being of people and flee the vice of shortterm production at the cost of the humanity culture ergonomic for peacebuilding
